

## **Module 2 - part 2**

### *IT Can Help* **Introduction to assistive technology**

This pack intention is to give basic assistive technology awareness training

## Introduction to Assistive technology

Assistive technology is an umbrella term for any device or system that allows an individual to perform a task they would otherwise be unable to do, or increases the ease and safety with which the task can be performed'. Royal Commission definition (1999)

## Assistive Technology Users

Blind / Visual Impairment

Cognitive / Learning Difficulties

Deaf / Hearing Impairment

Dyslexia / Specific Learning Difficulty

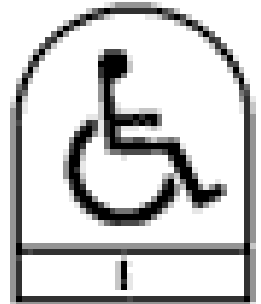

Hidden

Manual Dexterity

Mobility Impairment

- Speech

Everyone!

## BBC – My Web My Way(Free)

- Essential information.
- See <http://www.bbc.co.uk/accessibility/>
- Windows
- Mac
- Linux

*my web  
my way*

## **AbilityNet Factsheet (Free)**

- AbilityNet <http://www.abilitynet.co.uk>
- Click the At home tab(top of page)
- Select factsheets/Free resources(on the left)  
([http://www.abilitynet.co.uk/athome\\_factsheets](http://www.abilitynet.co.uk/athome_factsheets))
- Select Factsheets - numerous sheets inc
- Hearing Impairment and Computing
  - Keyboard and Mouse Alternatives
  - My Computer my way! A Guide to Making your PC Accessible,
  - Useful low cost programs and many more)
  - Skill Sheets (Useful information to leave with customer, and for self learning)

## **Assistive Technology for Mobility**

### **Access to the Graphical User Interface**

- Trackballs
- Keyboard
- Joystick
- Foot control
- Head Pointers

Alternative pointing devices, for example mouth sticks, are used to replace the mouse. The keypad on a keyboard can function as a mouse when used with software that turns the arrow keys into "mouse keys". Many alternative keyboards have mouse keys built in.

## **Visual Impairment**

RNIB is a national charity for “supporting blind and partially sighted people”. See <http://www.rnib.org.uk> for more information. To find practical information from the site, in the search box type fact sheet and then your topic. A few of the most useful are found below

### **Using a computer without vision** – technology information sheet

Summary: This information sheet from the RNIB highlights products that enable a blind person to use a computer by hearing in electronic speech what is displayed on the screen or read it as braille on a braille display.

[http://www.rnib.org.uk/xpedio/groups/public/documents/publicwebsites/public\\_withoutvisinfosheet.hcsp](http://www.rnib.org.uk/xpedio/groups/public/documents/publicwebsites/public_withoutvisinfosheet.hcsp)

### **Using a computer with low vision** – technology information sheet

Summary: This information sheet from the RNIB describes ways of accessing a computer if you have low vision. It looks at ways of enlarging the text on the screen using the operating system, screen magnification software and making use of large monitors and other adaptations.

[http://www.rnib.org.uk/xpedio/groups/public/documents/publicwebsites/public\\_lowvisioninfosheet.hcsp](http://www.rnib.org.uk/xpedio/groups/public/documents/publicwebsites/public_lowvisioninfosheet.hcsp)

### **What is a video magnifier?** – technology information sheet

Summary: This information sheet from the RNIB highlights video magnifiers (or CCTVs) which are a magnifying aid for people with

some useful vision. Printed material and objects can be placed under a camera and the magnified image is displayed on a screen.

[http://www.rnib.org.uk/xpedio/groups/public/documents/publicwebsite/public\\_lowvisioninfosheet.hcsp](http://www.rnib.org.uk/xpedio/groups/public/documents/publicwebsite/public_lowvisioninfosheet.hcsp)

## Ability Net

AbilityNet is happy for these documents to be copied and distributed. However we do ask you to keep the documents complete, so that our details are always available for people to contact us if they need further help.

## Factsheet List

Factsheets to download in PDF or MS Word format
